Prateek **Khare**

Product Manager · Software Engineer

Bangalore, India

(+91) 98976 58482 | prateekiitr60@gmail.com | prateekhare

"Be the change that you want to see in the world."

Summary

Product leader with 9+ years of experience building AI-assisted SaaS products from 0→1 to scale, combining deterministic systems with applied AI to support 10k+ daily automated actions and 1,000+ active users. Led cross-functional teams to deliver AI-driven classification and decision-support workflows, unlocking 20–70% operational efficiency gains while maintaining system reliability and trust.

Education

The University of Western Australia — *Perth, Australia*

Master of Business Administration - Global — *March. 2026*

Indian Institute Of Management Kozhikode — *Kozhikode, India*

Professional Certificate Programme in Advanced Business Management — *March. 2025*

Indian Institute Of Technology Roorkee — *Roorkee, India*

M.Tech. in Computer Science and Engineering — *May. 2015*

Indian Institute Of Technology Roorkee — *Roorkee, India*

B.Tech. in Chemical Engineering — *May. 2012*

Work Experience

Zigtex — *Bangalore, India*

Head of Product — *Nov. 2025 - Present*

- Led **0→1 product strategy and execution** for an outbound automation SaaS, owning vision, PRDs, prioritization, and launch roadmap while leading a **6-member cross-functional team**.
- Designed and shipped **safety-critical core systems** (RBAC, idempotent sending, reply-based auto-stops, bounce memory), enabling **10k+ emails/day/org with zero duplicate sends**.
- Defined and piloted **AI-assisted workflows** (reply classification, lead prioritization signals, pre-send risk insights), laying the foundation for scalable AI without compromising deliverability or trust.

GyanGrove — *Bangalore, India*

Head of Product (Previously Product Manager) — *Apr. 2024 – Nov. 2025*

- Joined as **first product hire**; promoted to **Head of Product** within 6 months at the early-stage edtech startup.
- Built and launched a **0→1 AI-powered school management platform** with 12 modules across academics, communication, transport, and finance.
- Defined product **OKRs** and KPIs to drive adoption, engagement, and performance across all user segments.
- Improved operational efficiency: 65% reduction in attendance time, 70% increase in parent engagement, 30% higher fee collection.
- Led a **9-member cross-functional team**; implemented agile execution, RICE-based prioritization, and **bimonthly release cycles**.
- Planned and executed **go-to-market (GTM)** rollouts including onboarding flows, training, and communication collateral.
- Collaborated closely on **UX/UI design**, mapped customer journeys, and incorporated **Voice of Customer (VoC)** via interviews and Intercom.
- Automated 60%+ of operations through AI-assisted notices, analytics, and fee reminders.

Ethos Life — *Bangalore, India*

Software Engineer — *May. 2022 - Nov. 2022*

- Being the first member of the team, **spearheaded team focused on persistence to detect fraud and minimize customer churn** in the online insurance issuance revolution.
- **Pioneered team formation**, leading initial planning, roadmap setup, and PRD creation for upcoming projects, cultivating scrum culture with TPM collaboration.
- **Led new vendor selection for user identity verification**, executing thorough market analysis, vendor meetings, and negotiations.
- Conducted **comprehensive analysis of consumer flow**, identifying potential churn areas; implemented monitoring dashboards.
- **Led redesign of user experiences** with a dedicated team of four, informed by consumer feedback.
- Collaborated with manager to **establish 3-member data analysis team**, delivering routine reports on diverse metrics.

Atlassian *Bangalore, India*

Software Engineer II *Jun. 2020 - Apr. 2022*

- Led the project to optimize Boards in Jira by deferring loading of specific functionalities, enhancing Time to Interact (TTI) for users. Collaborated with a **5-member team over 6 months**, achieving a **20% reduction in TTI.**
- **Headed a feature implementation** enhancing turnaround time for actions like Issue creation and Board transitions. Introduced eventual consistency for specific update queries, collaborating with a **4-member team, reducing page load time by 18%.**
- **Significantly improved observability of various matrices**, enhancing early detection of bottlenecks, inefficient query creation, and duplicate queries.
- **Conducted comprehensive analysis** of data points within the Time to Interact (TTI) matrix, specifically between p80 and p90 percentiles. Identified key areas for improvement, subsequently integrated into the roadmap for enhancement.

Visa Inc. *Bangalore, India*

Senior Software Engineer *Jul. 2015 - May. 2020*

- **Developed a subscription management tool** to initiate and manage services for diverse VISA clients.
- Summarized user review reports, leading redesign and development of user experience across modules like Third Party Agent (TPA) and High Risk Merchants (HRM). Modules **streamlined application creation time by 90%**.
- **Contributed to roadmap design** and architected migration of CoreConfig, Visa's legacy Client Profiling System with **800+ screens**, to open-source technology stack. Designed NodeJS-based Rules Engine for custom validations.
- **Managed a team of 9 members**, guiding successful delivery of VISA Direct Payment System—a P2P payment client onboarding platform.
- Utilized CoreConfig architecture to migrate report generation from legacy to open-source technology stack. This reporting system **condensed data from 800+ screens into readable PDF or Excel formats**.
- **Analyzed deployment cycle gap, crafting an in-house CI/CD pipeline** via Git, Artifactory, Jenkins, and Ansible. Integrated with Visa's cloud platform, the pipeline **became a widely adopted internal tool**, boosting code reliability and efficiency.

Certificates

May 25 **IBM AI Product Manager,** IBM *India*

Oct 23 **Google Project Management Certificate,** Google Inc. *India*

Skills

Product Strategy Agile, Scrum, Jira, Notion, Roadmapping, Sprint Planning, PRD Writing

Leadership & Ops OKRs, RICE, GTM, Stakeholder Mgmt, VoC, Customer Journey, Cross-functional Teams

Tech Stack Java, Node.js, Spring Boot, SQL, AWS, Datadog, Snowflake, Jenkins, Git, Sentry, Intercom

AI & Tooling ChatGPT 4, Gemini Advanced, Consensus, Notion AI

Patents

Authorization of virtual reality interactions using controlled randomization *US 15/479,096*

Objective: enhance payment security in VR system *4th Apr. 2017*

- Designed and implemented a robust 2-factor authentication system within a fully immersive virtual reality setting.
- Formulated an algorithm focused on countering password hacking via keyloggers and enhancing security measures.

System and method for secondary account holder payment device control *US 15/013,830*

Objective: enhance transaction visibility of secondary devices with minimal disruption *2nd Feb. 2016*

- Designed and executed a system empowering primary account holders to manage secondary device holders.

Additional Experience & Achievements

2013 **Acquired 99.90 percentile,** Graduate Aptitude Test in Engineering (GATE)

2012 **Acquired 94.40 percentile,** Common Admission Test (CAT)

2011 **Holder of Limca World Record,** for administrating and participating in making the World's Largest Political Map Ever Made by Hand on paper.

2008 **Acquired 98.44 percentile,** Indian Institute of Technology-Joint Entrance Exam (IIT- JEE)
